PROFESSIONAL SUMMARY

Full-Stack Engineer focused on building resilient, cloud-native systems and developer infrastructure. Active open-source contributor within the CNCF ecosystem (Go, Kubernetes, MCP). Experienced in engineering microservice API gateways, resolving critical concurrency defects in upstream codebases, and building scalable backend architectures. Strong foundation in Data Structures and Algorithms (DSA), applying optimized problem-solving and algorithmic efficiency to software design.

EDUCATION

Year	Degree/Exam	Institute	CGPA/Marks
2024-2028	Bachelor of Science (AI & ML)	Indian Institute of Technology Guwahati	8.0/10.0
2024-2028	Bachelor of Technology (Data Science)	Newton School of Technology, Rishihood University	7.26/10.0
2023-2024	Intermediate (Class XII)	Nirmala Jr. College Of Science, Mumbai	75.4%
2020-2021	Matriculation (Class X)	Shri Balaji International School, Mumbai	90.4%

EXPERIENCE

Full Stack Engineer April 2026 - August 2026
Safcurl Technologies Private Limited *Remote*

• Provisioned secure AWS EC2 environments using Terraform (IaC) and configured OIDC for session-based remote access.
• Engineered a polymorphic authentication layer and integrated an Nginx API Gateway to enforce strict multi-tenancy and route trusted identity contexts across microservices.
• Built dynamic Razorpay webhook listeners for "auth-first, charge-later" billing loops and integrated the Resend API for automated system updates.

PROJECTS

Apna Hostel (Github) (Demo) September 2026

Developed a mobile-first hostel fee portal for ITI and Diploma students using Next.js 16, TypeScript, Tailwind CSS, Better Auth, Drizzle ORM, and Neon PostgreSQL.
Implemented Google authentication, admin approval workflows, automated monthly rent generation, partial payments, printable receipts, and Cashfree payment verification with idempotent webhook handling.

PeerBot (Github) (Demo) April 2025

- Developed a full-stack chatbot platform using a single Next.js repository with MongoDB, enabling seamless frontend-backend integration.
- Implemented RAG using document uploads, vector embeddings, and LangChain for accurate, strictly based on the company's context & documents
- Delivered dynamic, context-aware AI chat flows that improve onboarding efficiency.

CERTIFICATIONS

Full-Stack Engineering Internship Completion Letter Safcurl Technologies Private Limited (Link) August 2026

Successfully completed a 5-month internship engineering cloud-native infrastructure, microservice API gateways, and scalable backend architecture.

SKILLS

- **Computer Language:** SQL, CSS, Python, Bash Scripting, Go, HTML, JavaScript, TypeScript
- **Databases & Data Tools:** MySQL, MongoDB, PostgreSQL, NoSQL
- **AI / ML:** LangChain, GenAI, LangGraph, Hugging Face, LangSmith, LLM
- **APIs & Testing:** Unit Testing, API testing, ESLint
- **Cloud & DevOps:** AWS, Kubernetes, Git and Github, Docker, Terraform, GitHub Actions, Docker Compose, Linux
- **Frameworks & Libraries:** React, Node.js, Bootstrap, Express JS, Tailwind, Next.js, Zustand, Prisma ORM

EXTRA-CURRICULAR ACTIVITIES

Merged 10+ pull requests across GSoC and LFX-CNCF ecosystem projects, driving core open-source infrastructure contributions for organizations like Kuadrant.
Led full-stack development for the EduNerve AI platform, executing rapid system architecture and prototyping under a strict 24-hour deadline at the NST Hackathon.
Built "Munimji" during Mumbai Hacks, collaborating to deliver a functional full-stack prototype under intense time pressure.
